Lesson 1

- Basic print statements and arithmetic
  Importing libraries Not covered
  String concatenation Not covered
  Arithmetic symbols
  Rounding a float Not covered

Code file name
basic_print_and_arithmetic.py

- Variable types   len **Not covered**

  string   complex   range

  int   list   dictionary

                     set

  float   tuple   boolean

Printing variables within string with print(f'{var}')

                                                        Not covered

join function for strings

Printing the type of a variable

Immutability of tuples

Logic with booleans
